## Implementation and Training
At Softweave Business Solutions, we understand the importance of proper system implementation to help easy take off of the new system. It is for this reason that our staff work with the staff of your organization to ensure smooth transition between your current system and Softweave ERM. We ensure correct data entry, proper training of the entire staff involved and we also setup mechanisms for on-time Support of the system, hence ensuring the system satisfactorily meets your organizations requirements.

## Maintenance and Support
Apart from travel or accomodation cost if onsite support is required, Softweave maintains for free the software online or otewise for a period of one year from the date of purchase

For continued support and regular updates, your organization may opt to pay a 30% fee of initial cost otherwise you may use the system as is as at the end of the 1st year, in which case any support required will be quoted at the time required

Should your organization require a new feature in the course of system use which was not part of your initial requirement, the cost of its implementation will be quoted separetely
